Description

About Us

ITOrizon is a global consulting and technology company that helps enterprises design, implement, and optimize complex supply chain and digital transformation initiatives. Headquartered in Atlanta, USA, with offices in India (Bengaluru & Trichy) and the UAE (Sharjah), we partner with global clients across retail, manufacturing, logistics, and distribution sectors.

We combine deep domain expertise with modern technology to deliver practical, scalable solutions. Our teams work across strategy, implementation, and managed services — helping organizations adopt leading platforms such as Oracle, Manhattan, Blue Yonder, and our next- generation composable enterprise platform, Karolium.

Role Overview

We are seeking a Consulting Sr. Manager / Design Leader with deep expertise in Manhattan supply chain applications and strong techno-functional consulting experience. This role will lead solution design and architecture across Manhattan implementations and transformations, working closely with enterprise customers, delivery teams, and program leadership.

You will own end-to-end solution design, guide technical and functional teams, and ensure scalable, high-quality Manhattan platform implementations across WMS/TMS management, and fulfillment domains.

Responsibilities

- Lead end-to-end solution design for Manhattan WMS, TMS, or related applications
- Own functional and technical architecture across implementations and upgrades
- Lead functional design across at least four supply chain modules in active delivery across industries served by ITOrizon and across supported product platforms and technologies, including Warehousing, Labor Management, Warehouse Automation, Transportation, Inventory & Order Management, Manufacturing, Supply & Demand Planning, Data Warehousing, Reporting, Analytics, and AI
- Conduct weekly project functional design review meetings and monthly support functional design reviews in collaboration with the Technical Architect, Design Architect, Technical Lead, Project Lead, and Project Manager
- Own and be accountable for functional design quality, standards, and best practices across programs
- Ensure cross-geo design alignment by including at least one peer reviewer from another geography in design reviews
- Translate business and operational requirements into scalable solution

designs
- Provide design governance, standards, and best practices across programs
- Guide configuration, extensions, integrations, and data architecture decisions
- Mentor functional and technical consultants across Manhattan programs
- Partner with client architects and business leaders on solution strategy
- Support estimation, proposals, and solution shaping for new engagements
- Ensure design quality across build, test, and deployment phases

Required Skills & Experience

- 10–15+ years in consulting with strong enterprise application expertise
- 8+ years of relevant industry and supply chain solution design experience
- Deep experience in Manhattan WMS, TMS, Active, or related applications
- Strong techno-functional background (design + technical architecture)
- Proven leadership in large Manhattan implementations or transformations
- Understanding of integrations, extensions, and enterprise architecture patterns
- Ability to translate operations and supply chain needs into system design
- Experience leading consulting or delivery teams
- Strong stakeholder and executive communication skills

Preferred Experience

- Multi-site or global Manhattan deployments
- Warehouse automation or omnichannel fulfillment programs
- Cloud/SaaS Manhattan architecture exposure
- Pre-sales, solutioning, or consulting leadership experience
- Integration with ERP, TMS, or commerce platforms

Education

- Bachelor's or Master's degree, Supply Chain, Information Systems, or related field

Why Join Us?

- Lead high-impact Manhattan transformation programs
- Shape solution architecture for global enterprises
- Influence consulting standards and design excellence
- Senior leadership growth path within supply chain consulting
