Description

About Us

ITOrizon is a global consulting and technology company that helps enterprises design, implement, and optimize complex supply chain and digital transformation initiatives. Headquartered in Atlanta, USA, with offices in India (Bengaluru & Trichy) and the UAE (Sharjah), we partner with global clients across retail, manufacturing, logistics, and distribution sectors.

We combine deep domain expertise with modern technology to deliver practical, scalable solutions. Our teams work across strategy, implementation, and managed services — helping organizations adopt leading platforms such as Oracle, Manhattan, Blue Yonder, and our next- generation composable enterprise platform, Karolium.

Role Overview

We are seeking a **Manhattan WMS Consultant** with **2–5 years of experience working with Manhattan Associates solutions** to support supply chain transformation and warehouse management initiatives.

The role requires hands-on exposure to Manhattan solutions, strong understanding of warehouse and supply chain processes, and the ability to support implementation, configuration, testing, and production support activities.

The ideal candidate should have experience in **at least two Manhattan solutions**, including **Manhattan – WM, SCI, Labor Management, Slotting, and ProActive**.

You will work closely with business stakeholders and technical teams to analyze warehouse processes, support solution design and implementation, and contribute to successful delivery of Manhattan-based supply chain initiatives for global clients

Key Responsibilities

- Analyze and document warehouse management and supply chain business processes and requirements
- Support configuration and implementation of Manhattan WMS and related Manhattan solutions
- Working experience in implementation / support of Manhattan Associates applications
- Translate business needs into functional specifications and solution designs
- Support Manhattan WM and related modules based on business requirements
- Participate in workshops, solution walkthroughs, and user discussions
- Prepare process flows, functional design documents, and test scenarios
- Support testing, validation, deployment, and post-go-live activities
- Collaborate with technical teams on integrations, data, and system behavior
- Analyze and troubleshoot functional issues and provide appropriate

solutions
- Provide functional support during implementation and stabilization phases
- Work closely with business stakeholders and project teams to ensure successful delivery

Required Skills & Experience

- **2–5 years of experience with Manhattan Associates solutions**
- Experience in **at least 2** of the following Manhattan solutions:
    - Manhattan WM — **Active WM preferred**
    - Manhattan SCI
    - Manhattan Labor Management
    - Manhattan Slotting
    - Manhattan ProActive
- Understanding of core **warehouse management and supply chain processes**
- Experience in Manhattan implementation, configuration, enhancement, or support
- Ability to translate business processes into system requirements
- Experience in functional documentation and testing support
- Strong analytical and problem-solving capability
- Good stakeholder communication and consulting mindset
- Ability to work effectively with business and technical teams

Preferred Experience

- Experience with **Manhattan Services**
- Experience working in a **consulting environment**
- Client-facing project experience
- Experience supporting Manhattan implementation or transformation projects
- Understanding of integrations and data flows within Manhattan / SCM ecosystems
- Exposure to warehouse processes such as inventory, inbound, outbound, picking, packing, shipping, replenishment, labor management, or slotting
- SQL, Excel analytics, or BI/reporting exposure

Education

- Bachelor’s or Master’s degree in Engineering, Supply Chain, Operations, Information Systems, Computer Science, or related fields

Work Authorization

US citizenship or green card or valid work visas required

Travel

Up to 75%
