NetSuite Developer

Responsibilities

- Design, develop, and implement custom Suite Script applications (1.0 & 2.0) utilizing Map/Reduce, Suite lets, and Restlets.
- Build automated workflows using Suite Flow to streamline business processes.
- Craft comprehensive customizations leveraging Suite Builder to extend core NetSuite functionalities.
- Design and develop advanced PDF templates to meet specific reporting needs.
- Integrate NetSuite with external systems using industry best practices.
- Possess good understanding of core NetSuite modules including O2C (Order-to-Cash), P2P (Procure-to-Pay), Inventory Management, and CRM

Qualifications

- **Bachelor's Degree (Preferred):** A bachelor's degree in Computer Science, Information Technology, or a related field is preferred.
- **NetSuite Certifications:** Hold relevant NetSuite certifications like Suite Cloud Developer or SuiteScript Developer.
- **Experience with Cloud Platforms:** Familiarity with cloud platforms like Amazon Web Services (AWS) or Microsoft Azure is a plus.
- **2+ Years of Experience:** At least 2 years of experience developing and customizing NetSuite applications is essential.
- **APIs and Integrations:** Experience integrating NetSuite with third-party applications using APIs and web services.
- **Experience with DevOps Practices:** Understanding of DevOps principles and tools for continuous integration and delivery (CI/CD) is a valuable asset.
- **Strong Communication and Collaboration Skills:** Ability to communicate effectively with both technical and non-technical audiences.
- **Understanding of Business Processes:** Knowledge of relevant business processes related to the industry the company operates in.
