Description

About ITOrizon: ITOrizon is a fast-growing, innovative technology consulting and services firm specializing in Oracle Cloud, Supply Chain Management, ERP, and Analytics solutions. We partner with our clients to transform their business processes and leverage technology for optimal performance. We are expanding our Oracle Fusion SCM practice and seeking talented individuals to join our dynamic project teams in Bangalore.

Role Overview: As an Oracle Fusion SCM Consultant at ITOrizon, you will be a key member of our project implementation teams, responsible for delivering robust Oracle Fusion Supply Chain Management solutions for our clients. You will leverage your functional expertise to understand business requirements, configure the system, and ensure successful adoption.

Responsibilities

- Conduct detailed business requirements analysis and translate them into functional specifications for Oracle Fusion SCM modules.
- Perform system configuration, setup, and testing within the specified Oracle SCM modules.
- Support data migration activities, including data cleansing, mapping, and loading.
- Develop and deliver end-user training and documentation.
- Collaborate effectively with client stakeholders, business users, technical teams, and other functional consultants.
- Identify and troubleshoot issues, providing timely and effective solutions.
- Assist in creating test scripts, executing testing cycles (Unit, SIT, UAT), and resolving defects.
- Contribute to project documentation, including functional design documents, test plans, and training materials.

Qualifications

- Bachelor’s degree in Supply Chain Management, Business Administration, Information Systems, or a related field.
- **2-3 years of relevant experience** in Oracle SCM Cloud implementations.
- Must have experience in **1 full life cycle implementation** from requirements gathering to go-live and post-production support.
- Strong understanding of core supply chain business processes.
- Excellent analytical, problem-solving, and decision-making abilities.
- Ability to work independently and collaboratively in a team-oriented, client-facing environment.
- Strong written and verbal communication skills.
- Proficiency in creating clear and concise documentation.
- Deep functional and configuration expertise in **Oracle Fusion Supply Chain Planning** This includes experience with Demand Management, Supply Planning, Sales and Operations Planning (S&OP), Production

Scheduling, and Backlog Management.

- Strong understanding of planning methodologies (e.g., MRP, MPS) and data collection processes within Oracle Fusion.
- Ability to analyze planning outputs and recommend solutions for optimization.
