# Platform Technical Senior/Architect - ITOrizon (Low Code / No Code PaaS)

# Description About Us

ITOrizon is a global consulting and technology company that helps enterprises design,

implement, and optimize complex supply chain and digital transformation initiatives. Headquartered in Atlanta, USA, with offices in India (Bengaluru) and the UAE (Sharjah),

We partner with global clients across retail, manufacturing, logistics, and distribution

sectors.

We combine deep domain expertise with modern technology to deliver practical, scalable solutions. Our teams work across strategy, implementation, and managed services — helping organizations adopt leading platforms such as Oracle, Manhattan.

Blue Yonder, and our next-generation composable enterprise platform, Karolium.

#### **Role Overview**

As a Platform Architect, you will define the technical vision and architecture for ITOrizon's Low Code / No Code PaaS. You will collaborate with engineering teams, product managers, and stakeholders to design robust, secure, and scalable systems.

Your role will be pivotal in shaping the platform's foundation, guiding engineering practices, and ensuring seamless integration across cloud-native ecosystems.

### Responsibilities

- Define and own the architecture roadmap for the Low Code / No Code PaaS.
- Design scalable, secure, and resilient distributed systems across frontend, backend, and data layers.
- Establish architectural standards, design patterns, and best practices for engineering teams.
- Collaborate with product managers and engineers to translate business requirements into technical solutions.
- Architect solutions for distributed caching, OLTP systems, and high-volume workloads.
- Oversee integration frameworks, workflow engines, and data transformation pipelines.
- Ensure cloud-native deployments and optimize workloads on AWS and Azure.
- Drive adoption of DevOps, CI/CD, and container orchestration (Kubernetes).
- Conduct architecture reviews, performance benchmarking, and security assessments.
- Mentor engineering teams and foster a culture of technical excellence.

# Hiring organization

**ITOrizon** 

# **Employment Type**

Full-time

# **Experience**

12+ years

## **Role Category**

**Technical Architect** 

#### Role

**Technical Senior Architect** 

#### Industry

PaaS | Warehouse Management | ERP | Enterprise Tech

## Job Location

Bangalore, India, India

# **Date posted**

December 5, 2025

# Qualifications

- 12+ years of experience in architecting enterprise-grade cloud platforms.
- Proven track record in designing scalable, secure, and resilient architectures.
- · Strong leadership and mentoring skills.
- Ability to balance innovation with pragmatic execution.
- Passion for building next-gen platforms and driving digital transformation.

# Why Join ITOrizon?

- Lead the architecture of a pioneering Low Code / No Code platform.
- Opportunity to shape enterprise innovation at scale.
- · Collaborative, innovation-driven environment in the heart of Bangalore.

## Why Join Us?

- Architecture & Design: Strong expertise in enterprise-grade cloud PaaS/SaaS architectures.
- Frontend & Backend: Angular, React, Java, Node.js, Python, GoLang, Scala.
- Workflow & Integration: JBPM, Apache Camel.
- Databases: NoSQL (MongoDB, Cassandra), PostgreSQL, OLTP systems.
- Caching & Performance: Redis, Distributed Caching.
- Cloud Platforms: AWS and Azure (hands-on expertise required).
- DevOps & Orchestration: Kubernetes, CI/CD pipelines, containerization.
- Security: Knowledge of enterprise security standards and compliance frameworks.

## **Preferred Certifications**

- AWS Certified Solutions Architect Professional
- Microsoft Certified: Azure Solutions Architect Expert
- Kubernetes Certifications: CKA (Certified Kubernetes Administrator), CKAD (Certified Kubernetes Application Developer)
- Security Certifications: CISSP (Certified Information Systems Security Professional), CCSP (Certified Cloud Security Professional)
- TOGAF or equivalent Enterprise Architecture certification

## **Good-to-Have Skills**

- Exposure to AI/ML technologies: AIML, LLMs, Vector Databases, RAG, MCP.
- Experience with event-driven architectures and microservices.
- Familiarity with observability tools and distributed tracing.

# How to Apply:

If you're ready to own quality at scale and shape the future of enterprise WMS PaaS testing, we'd love to hear from you.
